

## Overview

This job aid is used to assist providers with determining which drop down menus to select in order to locate a specific taxonomy of interest.

Several factors will determine which taxonomy the provider is eligible to enroll, including but not limited to ZIP+4 and Health Plan selection(s), services offered, required accreditations, etc. CSRA staff is not able to recommend or advise which taxonomies the provider should enroll. To determine if you meet the qualifications for a particular classification, please reference the provider qualifications checklist under Quick Links on the Provider Enrollment page:

<https://www.nctracks.nc.gov/content/public/providers/provider-enrollment.html>

## Searching the List

To search the following list, hold down the “Control” key, and press the letter “F”. The search field will display. Enter the search word in the field provided, and press the enter key to perform the search.

Classifications/specializations are not available for all provider types. In addition, some classifications/specializations are listed under more than one Classification. Continue to press the “Enter” key to search the entire document, to review all available options.

If the provider’s Area of Specialization is listed in the forth column, reference columns two and three to determine the drop down menu selections in NCTracks for the Provider Type and Classification. Providers should always select an Area of Specialization if available. If an Area of Specialization is not available, select the “Classification” level. If the Area of Specialization in NCTracks reads “None”, it will be necessary to select “None” for the Area of Specialization when selecting the taxonomy in NCTracks.

NCTracks Provider Type Indicator	NCTracks Taxonomy Provider Type Selection	Classification	Area of Specialization
